PROFESSIONAL SUMMARY

Full-stack developer specializing in front-end and back-end web application development, with a strong focus on architecting scalable SaaS products and robust, data-driven systems. Adept at leveraging modern tech stacks and cloud computing principles to create seamless, high-performance user experiences from initial concept to final deployment.

WORK EXPERIENCE

Freelance

2025-2026

Full stack Developer

Remote

- Designed and developed end-to-end web applications for diverse clients, transforming complex business requirements into scalable, user-friendly SaaS solutions.
- Architected robust back-end systems using Node.js and MySQL, optimizing database queries to significantly reduce application load times and improve server performance.
- Engineered responsive and dynamic front-end interfaces utilizing React and Tailwind CSS, resulting in highly intuitive user experiences across desktop and mobile platforms.
- Streamlined deployment pipelines by integrating Vercel and cloud server management practices, ensuring reliable uptime and continuous delivery for client projects.
- Collaborated closely with stakeholders to troubleshoot, debug, and maintain codebases, consistently delivering critical features ahead of strict project deadlines.

PROJECTS

Pawi | Financial Budget Tracker

2026

Lead Full Stack Developer

<https://pawi-finance.vercel.app/>

- Developed a comprehensive financial tracking application that empowers users to monitor income, expenses, and savings goals in real-time.
- Implemented a secure database architecture to manage sensitive user financial data efficiently and safely.
- Created an interactive dashboard using React and Tailwind CSS to provide clear, visually appealing insights into personal spending habits.

Capy | Mood Tracker and Travel Buddy

2026

Lead Full Stack Developer

<https://capy-app-fawn.vercel.app/>

- Architected a dual-purpose lifestyle application that seamlessly combines daily emotional check-ins with collaborative travel planning features.
- Designed intuitive, mobile-responsive interfaces to ensure logging moods and planning itineraries remains a frictionless experience for users on the go.
- Developed back-end APIs to securely sync user data, travel itineraries, and mood history across multiple devices.

Unifind | Student Marketplace

2026

Lead Full Stack Developer

<https://unifind1.onrender.com/>

- Built a centralized, campus-focused e-commerce platform facilitating the buying and selling of academic materials and essential goods among university students.
- Engineered a robust search and filtering system, allowing users to quickly locate specific items by category, price, and condition.
- Integrated an internal messaging API to enable seamless and secure communication between student buyers and sellers.

EDUCATION

CERTIFICATIONS, SKILLS & AWARDS

- **Skills:** Skills: Python; HTML; CSS; JavaScript; React; Node.js; MySQL; Vercel; Tailwind CSS; Java; Apache Derby; Hadoop (HDFS); Cloud Server Management; RESTful API Design; Object-Oriented Programming (OOP); A
- **Certifications:** Java Certification (CIRCUIT Trial Session, Batangas State University, 2025); Python Certification (2nd CIRCUIT Trial Session, Batangas State University, 2025); Robotics Certification (CIRCUIT Trial Session, Batangas State University, 2025).
- **Awards:** Advanced Technical Uptraining Recognition: Completed intensive CIRCUIT trial sessions in Java, Python, and Autonomous Robotics to bridge academic theory with practical industry standards.
