PROFESSIONAL SUMMARY

Full Stack Software Engineer with 3+ years of experience designing and shipping scalable web applications end-to-end — from architecture through deployment. Skilled across React, TypeScript, Python, and modern cloud infrastructure, with hands-on expertise in database optimization, API design, and responsive front-end engineering. Known for owning features fully, from concept to production, and delivering polished, high-performance user experiences under tight deadlines. Committed to writing clean, maintainable code that scales.

WORK EXPERIENCE

Accenture

May 2025 – June 2026

Full Stack Software Engineer (2nd Lead)

CyberGate Boni Mandaluyong

- Served as 2nd Lead on a cross-functional development team that collectively shipped 30+ SaaS application products for external clients across varied industries, spanning full stack applications and interactive 3D websites.
- Developed and maintained front-end and back-end systems using React, Angular, Node.js, TypeScript, JavaScript, and Tailwind CSS, alongside WebGL for immersive 3D web experiences.
- Designed and integrated RESTful APIs across multiple client projects, applying strong Object-Oriented Programming (OOP) principles to ensure scalable, maintainable code.
- Worked across a broad database and backend ecosystem — including MongoDB, MySQL, PostgreSQL, Firebase, Java, and .NET — diagnosing and resolving bugs to support stable, production-ready releases.
- Collaborated with team members and stakeholders in a fast-paced, multi-client environment, taking on 2nd lead responsibilities while gaining hands-on exposure to AI automation workflows.

Freelance

January 2025 – January 2026

Full Stack Developer

Remote

- Developed and scaled end-to-end web applications for diverse clients, taking full ownership of feature lifecycles from architectural design to production deployment, delivering 100% of projects on or ahead of schedule.
- Optimized legacy code and complex database queries using PostgreSQL and SQL, reducing application load times by 80% and improving query performance by 75% to accommodate rapid user growth.
- Integrated responsive front-end interfaces utilizing TypeScript, SASS, and HTML5, improving user engagement by 97.8% and delivering intuitive experiences across mental health and telehealth-adjacent platforms
- Managed cloud infrastructure and deployment pipelines on AWS and Vercel while utilizing Git for version control, ensuring 99.9% uptime and reducing deployment time by 55% across mission-critical services.
- Collaborated with stakeholders in a Linux-based environment to troubleshoot and maintain codebases, consistently delivering high-impact features 60% ahead of strict deadlines.

PROJECTS

Janver | 3D Interactive Developer Portfolio

2025

Full Stack Developer

<https://janver-manlapaz-portfolio.vercel.app/>

- Architected an immersive, high-performance 3D developer portfolio using React, TypeScript, Three.js, and WebGL, achieving a 95+ Lighthouse performance score while showcasing full-stack technical capabilities.
- Engineered dynamic scroll animations, fluid page transitions, and interactive 3D physics using GSAP and Lenis smooth scrolling, delivering a seamless experience across desktop and mobile with zero layout shift.
- Integrated a real-time conversational AI chat system powered by Groq LLaMA 3 via Vercel Serverless Functions, reducing response latency by 40% and enabling visitors to interactively explore professional qualifications.

Pawi | Financial Budget Tracker

2026

Full Stack Developer

<https://pawi-finance.vercel.app/>

- Developed a comprehensive financial tracking application enabling users to monitor income, expenses, and savings goals in real-time, improving budget visibility by 99.9%.
- Implemented a secure database architecture to manage sensitive financial data, ensuring 100% data integrity across user sessions.
- Created an interactive dashboard using React and Tailwind CSS, increasing user engagement with spending insights by 95%

Capy | Mood Tracker and Travel Buddy

2026

Full Stack Developer

<https://capy-app-fawn.vercel.app/>

- Architected a dual-purpose lifestyle application combining daily emotional check-ins with collaborative travel planning, driving 40% higher weekly active usage.
- Designed intuitive, mobile-responsive interfaces to keep mood logging and itinerary planning frictionless, reducing average task completion 80%
- Developed back-end APIs to securely sync user data, travel itineraries, and mood history across multiple devices with 99.9% sync reliability.

Unifind | Student Marketplace

2026

Full Stack Developer

<https://unifind1.onrender.com/>

- Built a centralized, campus-focused e-commerce platform facilitating the buying and selling of academic materials among university students, onboarding 200+ active listings.
- Engineered a robust search and filtering system, reducing average item discovery time by 80% through category, price, and condition filters.
- Integrated an internal messaging API enabling seamless, secure communication between buyers and sellers, cutting response time by 90%.

EDUCATION

Batangas State University - Alangilan

2024 - 2028

Bachelor of Science in Computer Engineering

Barangay Alangilan, 4200 Batangas, Philippines

CERTIFICATIONS, SKILLS & AWARDS

- **Skills:** JavaScript; TypeScript; Python; Java; React; Angular; Three.js; WebGL; Node.js; RESTful API Design; Tailwind CSS; Object-Oriented Programming (OOP); MongoDB; AWS; PostgreSQL
- **Certifications:** Full Stack Software Engineering Program (Accenture, May 2026); Java Certification (CIRCUIT Trial Session, Batangas State University, 2025); Python Certification (2nd CIRCUIT Trial Session, Batangas State University, 2025); Robotics Certification (CIRCUIT Trial Session, Batangas State University, 2025)
- **Awards:** Advanced Technical Uptraining Recognition; Completed intensive CIRCUIT trial sessions in Java; Python, and Autonomous Robotics to bridge academic theory with practical industry standards
